
The staff of Infotech Systems Management (ISM) has been providing computer and network technology integration since 1988. Our objective in professional consulting is to assist you in integrating your computer systems with the latest software and hardware solutions for your daily business operation.

Infotech's mission is to discover, develop and integrate solid information system technologies to better deliver relevant decision-making information accurately and quickly to our clients.

As leaders in Custom Application Development, we have designed various single and multi-user applications in the areas of student enrollment, accounting, budget forecasting, grant/fund management, and health care related information systems. All our applications incorporate intuitive designs to enhance usability while minimizing learning time for all users. In addition to providing effective database management tools, the staff of ISM are also experts in numerous software packages. This allows ISM to develop efficient and complete solutions tailored to your company's needs. ISM strives for the highest standards in customer satisfaction on every project we undertake. Our extensive knowledge in hardware and software ensures we can develop, maintain, and improve all your computer applications.

“The Infotech Way is an unreasonable commitment to excellence, empowerment, and integrity.”

The Infotech Way begins with an unreasonable commitment. **Unreasonable** is defined as not governed by or acting according to reason. While this word is sometimes used in the sense of unfair or insane, we use unreasonable in the sense of not being constrained by justifications. **Commitment** is defined as an agreement or pledge to do something in the future. Combining these definitions gives us an unreasonable commitment being an agreement or pledge that is not governed by reason. The Infotech Way is our promise to go beyond justifications in fulfilling on our three core values.
